GenesisTM Equine

Roundworm, Tapeworm and Bot Treatment for Horses

A complete horse wormer containing 8mg/g IVERMECTIN, a member of the macrocyclic lactone family of chemicals, and 100mg/g PRAZIQUANTEL

- Broad spectrum worm & bot activity
- Unique oil base
- Aniseed flavoured
- Wide safety margin
- Low dose – 1mL per 40kg bodyweight
- Convenient – graduated trigger applicator

BROAD SPECTRUM WORM & BOT ACTIVITY

When used as directed, **Genesis Equine** controls the following parasites in horses.

- Tapeworms:** *Anoplocephala perfoliata*
Anoplocephala magna
Paranoplocephala mammillana
 (adult and immature, heads and segments)
- Large Strongyles:** *Strongylus vulgaris* (adults and arterial larval stages)
Strongylus edentatus (adults and tissue stages)
Strongylus equinus (adults)
Triodontophorus spp (adults)
- Small Strongyles:** *Cyathostomum* spp
Cylicocycclus spp
Cylicostephanus spp
Cylicodontophorus spp
Gyalocephalus spp
 (adult and immature, including benzimidazole resistant strains)
- Pinworms:** *Oxyuris equi* (adult and immature)
- Ascarids:** *Parascaris equorum* (adult and immature)
- Hairworms:** *Trichostrongylus axei* (adult)
- Large Mouth Stomach Worms:** *Habronema muscae* (adult)
- Neck Threadworms:** *Onchocerca* spp (microfilariae)
- Bots:** *Gasterophilus* spp (oral and gastric stages)
- Lungworms:** *Dictyocaulus arnfieldi* (adult and immature)
- Intestinal Threadworms:** *Strongyloides westeri* (adult)

Genesis Equine is also effective for the control of skin lesions caused by the cutaneous larvae of *Habronema* spp and *Draschia* spp (summer sores) and the microfilariae of *Onchocerca* spp (cutaneous onchocerciasis).

UNIQUE OIL BASE

Genesis Equine is formulated as a gel using a thickened vegetable oil base. This ensures ease of dosing and minimises the loss of product from the horse's mouth onto the ground. **Genesis Equine** contains no inorganic or hydrocarbon solvents, minimising the potential harm to the animal's mouth and gut.

ANISEED FLAVOURED

Genesis Equine is aniseed flavoured, which encourages the horse to swallow the product rather than spit it out.

WIDE SAFETY MARGIN

Genesis Equine has a wide safety margin at the recommended dose level. It may be used in horses of all ages. Mares may be treated at any stage of pregnancy. Stallions may be treated without adversely impacting on their fertility.

Genesis Equine does not interfere with drug testing results.

LOW DOSE

Genesis Equine has a low 1mL/40kg dose rate, which delivers a standard dose of 0.2 mg ivermectin and 2.5mg praziquantel per kg bodyweight.

CONVENIENT – GRADUATED TRIGGER APPLICATOR

The individual 15g trigger applicator allows horses to be treated accurately and with ease. The applicator is graduated in kg; the dosage control knob is simply adjusted to coincide with the horse's bodyweight and locked in place before the plunger is depressed. Horses up to 600kg bodyweight can be treated with a single applicator.

PACK SIZES AVAILABLE

Individual 15g trigger applicator
Stud Pack (60 x 15g applicators)
